
About Physio Dubai 2010

Physio Dubai 2010 aims to present the latest scientific knowledge in various aspects of physiotherapy as a means of expediting professional development of physiotherapists and encouraging them to adopt evidence-based approaches in their practice. The conference programme will include keynote lectures, workshops and courses led by internationally recognised masters in the profession as well as free paper sessions and poster presentations on physiotherapy and its application in the management and rehabilitation of various conditions. Organised by the Emirates Physiotherapy Society of the Emirates Medical Association, the conference also seeks to promote collaborative learning networks among physiotherapists, both regionally and internationally.
