SonicWALL Inc.

Founded in 1991, "SonicWALL®":<http://www.tcf-me.com/sonicwall> provides a comprehensive portfolio of Network Security, Secure Remote Access, Web and E-Mail Security and Backup and Recovery. These solutions provide organisations of all sizes with the ability to secure their network systems, users and data with a deep level of protection that won't compromise network performance.

SonicWALL Network Security solutions integrate deep packet inspection technology with advanced security services, enabling organisations to take complete control of their network infrastructure and provide up-to-date protection against blended threats. Secure Remote Access solutions provide organisations with an easy and secure way to allow network access 24x7. Web and E-Mail Security solutions offer comprehensive protection against inbound and outbound threats. Using SonicWALL's Backup and Recovery solutions, organisations can experience the ease and reliability of real-time hands-free data backup, both locally and offsite. With the SonicWALL Global Management System, IT administrators can deploy, manage and monitor a distributed network from a central location.
